Examiner's Amendment

Application No. 10/663,810

the threshold value is set higher if the detector detects that the auxiliary battery apparatus is mounted than the threshold value set when the detector does not detect that the auxiliary battery apparatus is mounted.

5. (Currently Amended) A flash system with an auxiliary battery, comprising:

a flash apparatus ~~according to any of claims 1 through 4~~ that comprises a light emission unit that emits light with an electric charge stored at a main capacitor; a battery chamber in which an internal battery constituting a source battery is loaded; a mounting unit at which an auxiliary battery apparatus is detachably mounted; and a detector that detects whether the auxiliary battery apparatus is mounted; and

mf
~~an auxiliary battery apparatus according to any of claims 1 through 4~~ the auxiliary apparatus
~~battery having loaded therein an external battery to be connected in series with the internal battery,~~ wherein:

the internal battery and the external battery are each a cylindrical battery;

an internal battery space where a plurality of cylindrical batteries are loaded side-by-side in a row is provided at the battery chamber; and

an external battery space where a single cylindrical battery constituting the external battery is loaded so as to allow an axial center of the external battery to extend along a direction of the row in which the plurality of cylindrical batteries are arranged is formed at the auxiliary battery apparatus.

6. (Currently Amended) An auxiliary battery apparatus detachably mounted at an electric apparatus, comprising:

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The primary reason for allowance of claims 1-5 is the claim 1 and 5 limitation for a flash apparatus having detecting means detecting mounting of an auxiliary battery apparatus. Claim 5 is also allowable because of the limitation that the single cylindrical external battery of the auxiliary battery apparatus is loaded to allow its axial center to extend along a direction of the row in which the plurality of cylindrical batteries are arranged. The primary reason for allowance of claims 6-12 is the claim 6 and 11 limitation that a battery loading unit having an external battery is detachably mounted at the electric apparatus in place of the lid of the battery chamber of the electric device and the lid is attached to the battery loading unit concealing the battery. Claims 11 and 12 are allowable because of the claim limitation enumerated in the previous sentence and because of the limitation enumerated above with respect to claim 5, both of which are found in claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Art Unit: 2851

The word - - apparatus - - has been inserted after the first occurrence of the word "battery" in line 8 of claim 5.
